

AQUASPEC AQLBA ALKALINE LIFEBOUY LIGHT

The AQLBA Lifebuoy Light is an alkaline battery powered man overboard emergency light to be installed with a lifebuoy.

When the light enters the water, the head of the LED lamp end will float upwards above water due to the gravity design. The light will automatically activate and output a flashing white light.

Key features

- Powerful white flashing LED light
- Gravity sensor activates light
- Deactivates when LED lamp is downwards
- Functional, simple and compact design
- Fixing clip designed for easy installation
- Maintenance-free five year battery life
- Tamper-proof
