JASON'S CRADLE® FRC KIT

- The FRC kit consists of a Jason's Cradle® with stowage bag and a fixing kit that enables the cradle to be deployed on both the port and starboard side as required.
- Deployment of the cradle forms a non-collapsible scoop
- The FRC approaches the casualty slowly, keeping them on the windward side and the casualty is guided into the cradle headfirst.
- A strop is pulled to close the loop.
- A co-ordinated and methodical lift takes place and 'rolling' him over the tube into the rescue craft in the medically preferred horizontal position retrieves the casualty.
- Even with very heavy bodies the lift takes just a few seconds due to the cradle's 2 to 1 mechanical advantage.

JASON'S CRADLE® STRETCHER

- Speed and ease of deployment from high vessel freeboards
- The basket like format enables easy access
- Increase of efficiency and comfort levels of crews
- The casualty is in a full horizontal position reducing circum-rescue collapse
- 2-person recovery allows for rescue swimmers to be recovered with the casualty
