

OCEAN ISO ULTRALITE LIFERAFT

The Ocean ISO UltraLite Liferaft utilises carbon composite technology to achieve a significant weight reduction, compared to the traditional range of Ocean ISO liferafts.

It also includes a high-tech inflation system to ensure an efficient inflation process. The raft has been 3rd party approved to ISO 9650 Type I Group A requirements by the Notified Body RINA and French Regulations, Division 240, Division 333.

This liferaft offers the huge benefits of a lightweight solution for yacht designers, but most importantly larger liferafts are now easier to handle and deploy.
