

# ODEO STROBE

The ODEO Strobe is designed for use in lifesaving situations as a collision warning signal, or to pinpoint your position in a distress situation.

Approved to MED, SOLAS, MER and USCG requirements the ODEO Strobe is capable of a visible high intensity flash and includes an infrared signal.

The ODEO Strobe has a maximum luminous intensity of 50cd visible for over 3 nautical miles. Lasting up to 2 days, the strobe light is also waterproof to 50m (IP68).

## Key features

- User 'twist action'
- User replaceable batteries
- Lanyard
- Lightweight
- Flashing light
- 3 nautical miles visibility
- Infrared
- Velcro strap
- Transport Canada approved
