

# OCEAN SAFETY RESCUE CRADLE

**The Ocean Safety Recovery Cradle provides an intuitive and versatile man-overboard recovery solution.**

Its lightweight and durable design ensures quick, horizontal retrieval of individuals from the water onto a vessel, making it ideal for boats with a high freeboard. The cradle allows for rapid deployment in emergencies, whilst its compact design also ensures minimal storage space requirements.

## Key features

- Measuring 1.3 meters in width
- GRP ladder rungs encased in heavy-duty nylon webbing sleeves
- Robust heavy-duty PVC protective cover for enhanced durability
- Durable polyester webbing construction, rated to 2000kg
- Lightweight design for easy handling
- Annual servicing not required
- Multi-deck anchor points for versatile attachment
- Easily portable for convenient transport
- Compact design requiring minimal storage space
- Offers multiple functions: recovery cradle, boarding ladder, and scramble net
- Fast deployment for immediate use
- Supports both manual and power-assisted functionality
- Webbing with high visibility for enhanced safety
- Durable stainless steel components
