

JON BUOY SEARCH & RESCUE (SAR) HORSESHOE

The Inflatable Search and Rescue Horseshoe can be used as a direct replacement for the traditional horseshoe lifebuoys.

Designed for use in rescue situations at sea or in any waterway, it allows increased accuracy by an under or over arm throw. The SAR Horseshoe offers a more ergonomic and streamline design for improved deployment to provide buoyancy to a MOB casualty.

This compact unit is fitted with an oral tube, retro reflective tape, and an automatic inflation system as standard. An automatic Aquaspec AQ40 light is an optional extra that can be fitted to the horseshoe.

Key features

- Water activated inflation
- Ergonomic design
- Rapid deployment
- Lightweight - 600g
- Compact & easy to store
- Retro reflective tape
- Highly visible neon fabric
- Optional light
